### B1.Tạo Combo Box Giaden

Combo Box Wizard

This wizard creates a combo box, which displays a list of values you can choose from. Here do you want your combo box to get its values?

☐ I want the combo box to get the values from another table or query.

☒ I will type in the values that I want.

CancelNextFinish

Combo Box Wizard

What values do you want to see in your combo box? Enter the number of columns you want in the list, and then type the values you want in each cell.

To adjust the width of a column, drag its right edge to the width you want, or double-click the right edge of the column heading to get the best fit.

Number of columns: 2

Col1	Col2
5000000	5 triệu nghìn đồng
2000000	2 triệu đồng
4000000	4 triệu đồng
6000000	6 triệu đồng
8000000	8 triệu đồng
10000000	10 triệu đồng
30000000	30 triệu đồng

CancelBackNextFinish

Combo Box Wizard

When you select a row in the combo box, you can store a value from that row in your database, or you can use the value later to perform an action. Choose a field that uniquely identifies the row. Which column in your combo box contains the value you want to store or use in your database?

Available Fields:  
Col1  
Col2

CancelBackNextFinish

Combo Box Wizard

What label would you like for your combo box?

[Giá trị]

Those are all the answers the wizard needs to create your combo box.

Form Properties  
Properties

Command Button Wizard

What action do you want to happen when the button is pressed?

Different actions are available for each category.

Categories

Record Navigation  
Record Operations  
Report Operations  
Application  
Miscellaneous

Actions

Apply Form Filter  
Close Form  
Close Table  
Print a Form  
Print Current Form  
Refresh Form Data

Cancel < Back Next > Finish

Command Button Wizard

What form would you like the command button to open?

frm\_KQTimDT  
frmTraTimDT

Cancel < Back Next > Finish

Command Button Wizard

Do you want the button to find specific information to display in the form?

For example, the button can open a form and display the data for a specific employee or customer.

Open the form and find specific data to display.

Open the form and show all the records.

Cancel < Back Next > Finish

Command Button Wizard

What do you want to name the button?

A meaningful name will help you to refer to the button later.

cmdTm

That's all the information the wizard needs to create your command button. Note: This wizard creates embedded macros that cannot run in Access 2003 and earlier versions.
